

# BRINGING SAFETY HOME

## 12 WAYS TO PROTECT WHAT MATTERS MOST

**Avoid utility damages. Prevent jobsite incidents.**

Follow these essential tips so you can return home to the people who count on you.

**BECAUSE EVERY SAFE DECISION ON THE JOB BRINGS YOU ONE STEP CLOSER TO HOME.**

Remember your family and the folks that depend on you! You provide for your family.

Others in your community depend on you. Don't be selfish or foolish while at work.

Remember that there's no such thing as a "safe jobsite". They ALL have hazards.

Slow down and think about doing the job safely. Don't get in a hurry.

Don't add to the hazards by being risky or unsafe. Don't make things more unsafe.

Find, read, know, and follow your company's safety rules. Help others follow the rules.

Don't be complacent. Nobody is guaranteed today, tomorrow, or the future.

Prepare, plan, and be ready. Have all personal protective equipment ready.

Teach others the correct, safe way. Don't teach others unsafe methods.

Check the equipment. Don't use unsafe or dangerous tools, machines, or equipment.

Drive safely. Wear your seat belt and stay off your phone. Pay attention to the road.

Each day is a gift. You don't have a choice. You MUST get home to your family, safe.
