# *Flint Walton*

## Technical Services and Training Specialist, Safety and Risk Services

**Biography:** Flint Walton is the Technical Services and Training Specialist at MEM. Walton is responsible for planning and conducting training sessions with associations, business groups, clients and agents, and hosts sessions at conferences and insurance agencies. He also provides additional on-site safety services.

Walton has 35+ years of experience in loss prevention and has assisted companies in various industries with their safety efforts. Flint routinely trains thousands of employees, business owners, managers and insurance agents across the region. He has presented at national events, including the Public Risk Management Association conference, National Safety Council's Congress and Expo, and American Society of Safety Professionals.

Flint assists associations in improving the safety performance of their membership, through presentations, customized safety talks, sample safety rules, and assist in education committee for conferences.

He works with insurance agencies to coordinate and perform continuing education on general workers compensation insurance topics, explanation of the experience modifier, ethics, risk management, the agent's role in safety and works with Claims and Premium Consultation for claims management and understanding of the audit process. All to help agencies maintain their book of business by offering custom training for their clients.
